

raphy headed by Dr. James Wakelin, and by the information developed during both House and Senate hearings on proposed NOAA legislation.

Many of those who have advised me have proposed additional reorganizations, and it may well be that in the future I shall recommend further changes. For the present, however, I think the two reorganizations transmitted today represent a sound and significant beginning. I also think that in practical terms, in this sensitive and rapidly developing area, it is better to proceed a step at a time—and thus to be sure that we are not caught up in a form of organizational indigestion from trying to rearrange too much at once. As we see how these changes work out, we will gain a better understanding of what further changes—in addition to these—might be desirable.

Ultimately, our objective should be to insure that the nation's environmental and resource protection activities are so organized as to maximize both the effective coordination of all and the effective functioning of each.

The Congress, the Administration and the public all share a profound commitment to the rescue of our natural environment, and the preservation of the Earth as a place both habitable by and hospitable to man. With its acceptance of these reorganization plans, the Congress will help us fulfill that commitment.

RICHARD NIXON.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

I transmit herewith Reorganization Plan No. 4 of 1970, prepared in accordance with chapter 9 of title 5 of the United States Code. The plan would transfer to the Secretary of Commerce various functions relating to the oceans and atmosphere, including commercial fishery functions, and would establish a National Oceanic and Atmospheric Administration in the Department of Commerce. My reasons for transmitting this plan are stated in a more extended accompanying message.

After investigation, I have found and hereby declare that each reorganization included in Reorganization Plan No. 4 of 1970 is necessary to accomplish one or

more of the purposes set forth in section 901(a) of title 5 of the United States Code. In particular, the plan is responsive to section 901(a)(1), "to promote the better execution of the laws, the more effective management of the executive branch and of its agencies and functions, and the expeditious administration of the public business;" and section 901(a)(3) "to increase the efficiency of the operations of the Government to the fullest extent practicable."

The reorganizations provided for in the plan make necessary the appointment and compensation of new officers as specified in section 2 of the plan. The rates of compensation fixed for these officers are comparable to those fixed for other officers in the executive branch who have similar responsibilities.

The reorganization plan should result in the more efficient operation of the Government. It is not practical, however, to itemize or aggregate the exact expenditure reductions which will result from this action.

RICHARD NIXON.

THE WHITE HOUSE, July 9, 1970.

MESSAGE OF THE PRESIDENT

To the Congress of the United States:

America is a nation unique in the political history of the world. More than any other nation, it is the sum of the energies and efforts of all of its people. The American tradition of voluntary involvement—of freely committing one's time and talents in the search for civic improvement and social progress—gives an extra dimension to the meaning of democracy. In the past decade the Federal Government has built on this tradition by developing channels for joining the spirit of voluntary citizen service in America with public needs, both domestically and abroad. Many of these efforts have had marked success. But the circumstances in which these efforts were conceived have changed.

National and international needs have altered. The opportunities for voluntary service must be adapted and improved to meet these new needs.

Recognizing that private channels of voluntary action are a vital source of strength in our national life, I have supported the establishment and development of the National Center for Voluntary Action. The National Center is a private, non-profit partner in the effort to generate and encourage volunteer service. The Center works to promote the establishment of local Voluntary Action Centers, as well as to assist in the expansion of voluntary action organizations already in existence. It stimulates voluntary action by providing information on successful voluntary efforts, and it assists in directing those who wish to volunteer services to areas and endeavors in which their services are needed.

The National Center for Voluntary Action is functioning now to fill a vital need in the private voluntary sector. Now we must turn our attention to bringing government volunteer programs into line with new national priorities and new opportunities for meeting those priorities. We must take full advantage of the lessons of the past decade, and we must build on the experience of that period if we are to realize the full potential of voluntary citizen service. This is no longer a matter of choice. We cannot afford to misuse or ignore the considerable talents and energies of our people. In the coming years, the continued progress of our society is going to depend increasingly upon the willingness of more Americans to participate in voluntary service and upon our ability to channel their service effectively.

One matter of consequence to the problems of properly channeling volunteer services and expanding government's role in the development of volunteer resources is the proliferation of government volunteer programs. It was perhaps inevitable that these programs would be generated almost at random across the spectrum of government concern for human needs. This occurred in a period when the Federal Government was still attempting to define its relationship with, and its purposes in, the area of voluntary service. Now the role of government has been confirmed and its responsibilities and obligations are clear. Meeting these responsibilities and obligations will be a long, difficult, and challenging adventure. But it is an adventure we can look to with excitement and with the knowledge that the only sure source of failure can be a failure of the will of the American people. I do not believe it will fail.

The foundation for a greatly expanded government contribution to volunteer service already exists. Now
